Create

For more than forty years, Parthos has been the leading manufacturer of movable wall systems. We assign the highest possible priority to traditional craftsmanship and a high standard of quality. This applies especially to the development of custom-made solutions for hotels, congress and convention centers, schools, restaurants, shopping centers and commercial buildings. Parthos was the first manufacturer in this area to receive ISO 9001-2000 certification. The movable glass walls in our President series are elegant, offer countless practical applications and create a perfect partition for those whose foremost interests include spaciousness, design and transparency.

privacy with
an open look and feel

president

Clear options

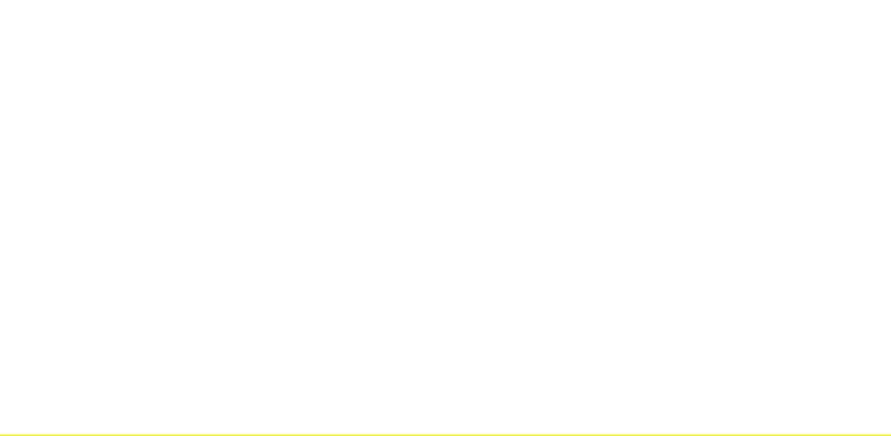

Movable glass walls offer a variety of applications: in shops, hotels, cafes and restaurants and government, banking and insurance buildings, for instance. The President series makes it easy for you to create privacy, while its transparency and open look and feel will allow the space itself to remain intact. Thanks to its slim construction, this functional and stable wall will take up only a remarkably small amount of space in a parked position.

for every space

From shopping-arcade to reception area: the President is stylish and will let in plenty of light. For additional privacy, the glass can be etched, sandblasted or decorated with foil. Your company logo, texts and entire designs can also be added. Because Parthos develops and produces the President series completely under its own management, there's practically no limit when it comes to turning creative ideas into practical solutions. A selection can be made, for instance, between straight and curved, as well as segmented panels. Let your imagination run free and discover, with the help of our consultants, which movable glass wall will be shown to its best advantage in your project!

An enormous degree of user-friendliness and an extensive range of options as to design and finish are among the President's greatest advantages. In addition to design, Parthos also pays a great deal of attention to user-friendliness. We have developed an ingenious automatic locking system. Thanks to this, the operation of the wall takes hardly any effort. Over the past few years, Parthos has accumulated a vast amount of knowledge and experience in bearing technology and rolling properties of a variety of different materials. This allows us to guarantee our customers that all our elements can be moved smoothly and noiselessly.

President

- completely transparent partition;
- height up to 3.5 metres;
- curved segmented models available;
- virtually unlimited choice of options in pattern and design;
- high-quality track and trolley system;
- extremely durable clamping construction without necessity of drilling the glass
- profiles and track available in every color

Perfection to even the tiniest details: that's one of Parthos' typifying characteristics. From raw materials and a perfectly monitored production process to finished products of the finest quality. Our standard options include an extensive choice of glass types and finishes. Regardless of whether your interior is dominated by light or dark colours: the aluminium parts of our President series are available in nearly every colour imaginable.

president

Advantages of engineer

An important detail: the glass panels of the President series have been developed so that vertical aluminium profiles will not be necessary. So no matter where your wall is to be installed, you can always choose an unbroken design without the obstruction of unnecessary frames. Clarity and transparency are among our highest priorities.

a well
red design

Our mission at Parthos is to design products that are perfectly suited to the ideas of our designers and the requirements of our customers. Our perfect solutions are based on many years of experience and an extensive knowledge of movable wall systems. Do you have any special requirements or are you curious about what we can do for your project? Please don't hesitate to contact us. Our expert consultant will be happy to inform you of all the possibilities.
