designed  
for space

# Flexibility with robust simplicity

With the Mono Parthos emphasises the most essential aspects of movable walls: flexibility and the efficient use of space in as simple a form as possible.

The single panels form the basis of a robust accordion-style folding wall that is very easy to use. The ball bearing trolleys with PVC treads run smoothly and silently along the high-quality aluminium track. This hard-wearing system guarantees easy and especially fast operation. The Mono does not require floor guides.

Parthos' wall systems aren't only easy to use, they're also easy to assemble. It's easy to install the wall: using clear assembly instructions, the Mono can, in principle, be installed by one person. Of course, you can always call upon one of our experienced assembly teams.

The Mono is available in diverse panel widths and many combinations are possible: closure on one side, centre closure or closure on both sides. It's also possible to connect several walls together: The closing post is fitted with a simple lock function. Parthos also offers a heavier lock and a cylinder euro lock.

When the wall is completely open, the panels form an attractive partition that takes up very little space. Add the favourable price and a wide range of finishes and you'll see why the Mono proves its worth in commercial and industrial building as well as in the home.

For more than forty years, Parthos has been the most versatile manufacturer of movable wall systems. We assign the highest possible priority to traditional craftsmanship and a high standard of quality. One of our specialities is the development of flexible space-saving solutions for schools, restaurants, shopping centres, hotels and commercial buildings. Parthos was the first manufacturer in this area to receive ISO 9001-2000 certification. Our greatest strength lies in our ability to deliver custom work.

# Playing with space

Already since 1968 Parthos produces folding doors. From that time Parthos is known as a worldwide supplier of space-saving folding doors.

With Parthos Spacers, you no longer have to take into account the rotation of (cupboard) doors. Where revolving doors can mean a (space)problem, the Spacers from Parthos offer the ultimate solution. In no time you can turn these folding doors into a partition between study, work or play corners and other spaces. They are the ultimate solution for extra space and comfortable living! Spacers hang from a rail so you aren't bothered by annoying floor guides. Our folding doors are a contemporary, stylish asset for your interior.

# spacers

## Mono

- single folding wall
- choice of several panel widths
- perfectly easy to operate
- easy assembly
- very attractive price
- large selection of finishes
- very "space friendly"
- multiple closures
- minimal (architectural) facilities required

Type	Mono
Wall height	500-3700 mm
Wall width	max 15000 mm per wing
Panel width	120, 150, 200 of 250 mm
Board material	14-16 mm
Vertical profiles	PVC hinge profiles
Closing profiles	anodised aluminium
Weight	ca. 11 kg/m <sup>2</sup>

Are you interested in different product finishes or sizes? Please don't hesitate to contact us. We will gladly inform you of all the possibilities. Parthos retains the right to make product changes without notice.

Spacers are available in different types: Prince, Royal and Classic. All three types of panels connect to one another with steel springs and wooden hinge frames. This unique and patented Parthos invention guarantees smooth operation and a long and problem-free lifespan. Thanks to the wide selection of quality veneers, the Prince, Royal and Classic fit seamlessly in every interior, from modern to classical.

# For more comfort

## Prince

The Prince is characterised by its elegant, slim-line panels. With the Prince, you are guaranteed an extremely functional space-maker.

## Royal

The Royal is a folding door with panache. Its perfectly finished, broad panels give your interior an extra stylish look.

## Classic

The Classic is the ultimate combination of privacy and spaciousness. The panes in the broad panels provide a sophisticated incidence of light and give your living or work area extra dimension.

The panes are available in transparent or smoke-coloured shock-resistant acrylic or bevelled glass.

## Page 110

The slim-line panels of the Page 110 give your interior an extra modern look. This functional folding door allows you put your living or work areas to optimal use.

## Page 150

The Page 150 has wider panels than the Page 110. That means this folding door takes up even less space when folded up. Talk about creating space! This stylish folding door enables you to decorate your interior tastefully and very practically.

## Page 150 Glass

Do you like lots of light and space? Then be sure to choose the Page 150 Glass. The panes in the panels provide extra light and give your living or work space a contemporary cachet.

All Spacers folding doors are fitted with a locking function. When folded up the panels take up very little space. In short: the best possible way to create space!

Spacers are easy to assemble yourself. The folding door includes clear assembly instructions as well as all the required accessories.

Parthos' Spacers offer you many possibilities. You can determine whether the door closes on the left or right, in the centre or on both sides. Spacers can even be connected at right angles. Curved rails are also possible. Now that's really playing with space!

Even though the Parthos Spacers concept has been on the market for many years, it still offers a suitable solution to almost any contemporary, everyday space issue.
