

DOUBLE GLAZED ACOUSTIC MOVABLE WALLS

transpalace

PARTHOS

PARTHOS
designed
for space

With the installation of a Transpalace double glazed acoustic movable wall with individual operable panels and narrow frames, you can create space, allow daylight to enter and create an infinite range of possibilities for the distribution of the rooms in your building.

Since the width of the partition is covered with surface-mounted, clear safety glass with a very narrow frame, which can be coated in any desired design on the rear side of the glass, the Parthos Transpalace can easily meet the high architectonic demands of sound insulation, as well as any desires regarding space, flexibility and transparency.

The most exclusive model in the Palace series is the Transpalace. This sturdy, transparent movable wall has been finished with double-layer safety glass. The mobile panel partition is very user-friendly due to its semiautomatic controls, which allow the wall to be opened, partially opened or closed in no time. The narrow vertical anodized aluminium profiles protect the glass perfectly and can also be powder coated in any desired RAL colour.

The spatial character of the room can be preserved through the application of glass. This is possible despite the fact that you benefit from the high-quality Palace features, such as a high sound insulation value and a beautiful design. The technology is incorporated in a subtle way behind a narrow frame and can be supplied in all RAL colour.

A unique feature of this glazed mobile partition is the fact that pass doors can be integrated into the panels with identical glass finish. This practical application will maintain the aesthetic whole.

New! Transpalace with narrow frame

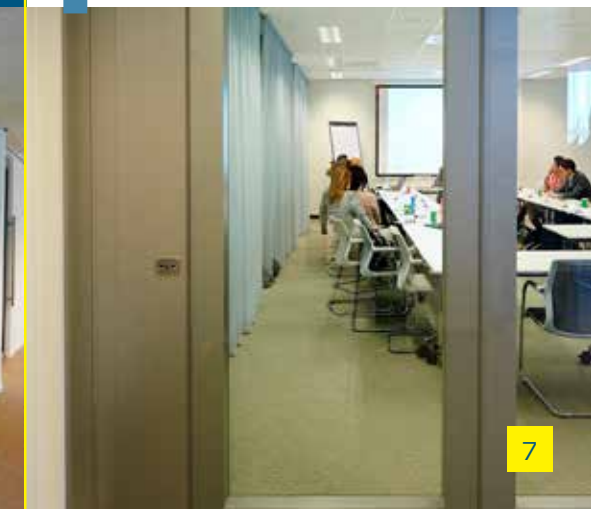

Unprecedented design possibilities

transpalace

Transpalace

- Sound insulation value 46-50 dB Rw
- Maximum height: 3500 mm
- Fire resistant glass
- Approximately 80 mm or 100 mm depending on the chosen model
- Spindle mechanism: hand-operated or semi-automatic
- Guidance system: high-quality rail and roller system without floor guides
- Structure: aluminum self-supporting frame structure
- Design: innumerable finish options All glass treatments are applicable. (See pages 8 and 9 of this brochure for examples.)
- Profiles: standard aluminium profiles can be lacquered in any RAL colour
- Parking: innumerable parking options

Integrated blinds

By using a Transpalace partition, you create an open and bright environment, while retaining high acoustic insulation and the contemporary functional design.

Extra options and creative ideas

What makes this Transpalace wall so special is the fact that all individual elements can be equipped with electrically operated blinds. The blinds can be operated all together simply pressing a button when the partition is closed - from top to bottom, open or close. This ensures a dynamic appearance that combines privacy and transparency.

In addition, manifestation and inscriptions can be applied to the inside or outside of the glass, allowing extra durable functionalities to be added to the mobile glass partition. The glass can also be engraved, sandblasted, digitally printed and screen-printed. 'Smart glass' can also be applied!

Parthos, versatile and unique

Parthos is the world's most versatile manufacturer of mobile partitions and doors, interior projects, metal structures and turnkey solutions. More than 45 years of knowledge and experience form the basis of the maximum result that we are always able to produce. Parthos is synonymous with sustainability, traditional craftsmanship and the customization of even the smallest details.

The Parthos Group consists of:

- Parthos BV mobile partitions and interior projects
- Parthos Metal BV
- Parthos Construction BV
- Parthos Inraumsysteme GmbH

With manufacturing and sales locations throughout Europe, Africa and Asia.

The product range of Parthos comprises:

- Mobile partitions
- Glass partitions
- XXL sliding walls
- Folding walls
- Folding doors
- Glass folding walls
- Interior projects
- Metal structures

Designed for green

Parthos mobile space solutions give you optimum flexibility in the use of square meters, saving space as well as energy. Contributing to the environment and improving the quality of life, Parthos mobile space solutions are designed for green with a product life cycle of more than 25 years whereupon completely reusable!

In the area of interior construction/shop design, Parthos has already completed many reference projects for the retail sector, offices, museums, schools, the healthcare sector, the government and the catering sector.
